

BIG

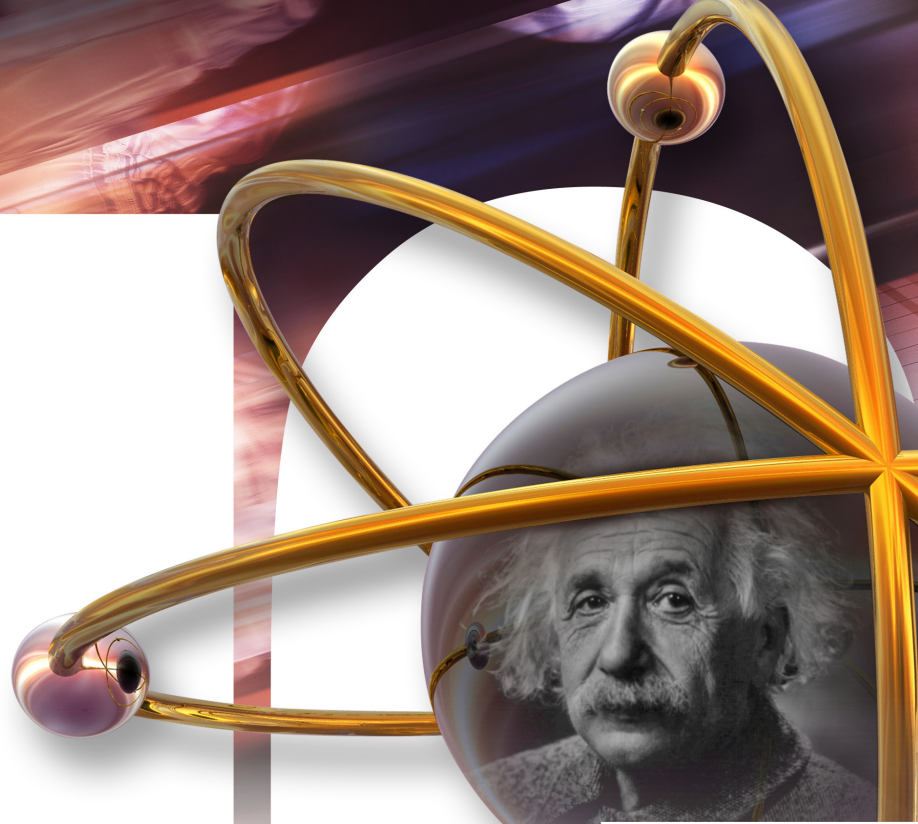

alignment
between
BUSINESS
and **IT**

is now within
your reach

All it takes is a

LITTLE GENIUS

COMFRAME
precision software innovation

You won't need the theory of relativity to help your workers effectively **MANAGE** complexity, **CAPITALIZE** on information or **COLLABORATE** across boundaries in order to advance the business. You will need a certain amount of **GENIUS**, however.

ComFrame has the **INTELLECT**, **SPEED OF LIGHT** delivery methods and **COMMAND** of modern technologies needed to bring all the right elements into alignment for **BUSINESS** and **IT**. ComFrame offers you:

- Application Development Solutions
- Strategy & Program Management Services
- Business Intelligence & Enterprise Data Management
- Collaboration & Knowledge Management
- User Experience Engineering
- Global Delivery Approach

more →

GENIUS for Transforming IT

ComFrame helps you achieve business and IT alignment and efficiency, moving you from a “basic” stage of optimization, where IT is considered a “cost center,” toward a more “dynamic” state, where the business value of IT is clearly understood and viewed as a growth enabler and strategic asset. ComFrame solutions support:

Business Decision-Makers
Business Productivity Optimization , including technology and services that help you streamline management and control of content, data and processes across all areas of your business.
➔ Collaboration – Simplify how people work together
➔ Enterprise Content Management – Simplify managing and securing forms, documents, records and Web content
➔ Enterprise Search – Provide faster, easier, more intuitive access to the information people need
➔ Business Intelligence – Improve the quality of business insight through advanced reporting, scorecards, dashboards and analytics

IT Decision-Makers
Application Platform Optimization , including technology and services that help you empower employees with a more flexible, secure, agile and interoperable application platform.
➔ Precision Application Development – Quickly deliver connected, flexible, and highly-secure applications
➔ User Experience – Amplify the productivity of your employees and improve the customer experience
➔ SOA and Business Process – Achieve fast and easy integration across all applications and respond rapidly to change
➔ Enterprise Data Management – Provide the data people need to make informed decisions at every level of the business

GENIUS to Assess Your IT Potential

A **Business Productivity Optimization Assessment** or **Application Platform Optimization Assessment** is the first step toward transforming IT into a true corporate asset that delivers better intelligence, security, collaboration, mobility and customer relationships. A ComFrame evaluation of your environment will:

- ➔ Show how your organization compares with industry peers across each of the areas listed in the tables above
- ➔ Provide specific recommendations for improvement
- ➔ Estimate your expected revenue increases/cost savings

Using our report, your organization can gauge the current optimization level of its infrastructure, establish a technology vision for the future, and build a clear project roadmap to improving the performance of your people through better business productivity and application platforms.

a LITTLE GENIUS from ComFrame & Microsoft

Einstein’s thinking changed the way we look at the universe. ComFrame and Microsoft thinking changes the way business and IT professionals look at information management. **GREAT MINDS** think alike.

Schedule your **Business Productivity** or **Application Platform Optimization Assessment** today:
