

Enterprise Project Management

Guide Business Change with Clarity, Agility and Precision

Year after year, the need to elevate project management maturity is a top concern for large companies. However, the combination of people, processes and tools required to change an environment is fraught with numerous risks. How can a company realize the promises of a transparent and accountable project environment and make the right choices about which projects and initiatives are best for the strategic direction of the enterprise?

Enterprise Project Management is ComFrame's holistic approach that brings together rare but critical skills to establish end-to-end project management best practices, resources and automation tools to help your organization manage its entire portfolio of IT projects in a mature and effective manner. It includes:

- ✓ Portfolio Management – “**Doing the right projects**”
- ✓ Project Management – “**Doing projects right**”

Project Portfolio Management

ComFrame Portfolio Management solutions help organizations gain in-depth visibility and transparency across enterprise projects, evaluate progress toward project targets and enable better management decisions based on accurate, objective data. It provides a way to:

- ✓ Determine the best combinations of new projects and existing systems
- ✓ Provide a continuous loop of communication and collaborative planning
- ✓ Control unnecessary investments
- ✓ Consistently measure the performance of projects across the enterprise
- ✓ Tie project value to costs
- ✓ Kill projects that no longer align with corporate strategy

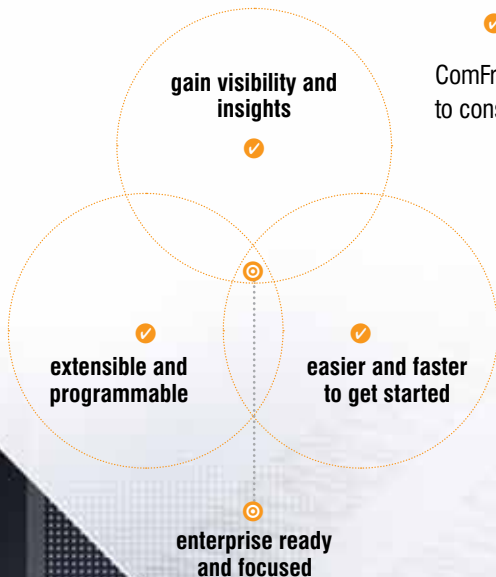

We establish a central repository where all project-related information is stored and categorized and set up a web-based interface through which all project monitoring, status update, tracking and reporting are accomplished. Our solutions provide:

- ✓ Full-automation, from project prioritization to execution and closure
- ✓ Organization of projects into portfolios
- ✓ Resource scheduling, tracking, workload and availability
- ✓ Skills inventory management
- ✓ Real-time IT governance processes
- ✓ Configurable project initiation & product lifecycle management
- ✓ Dynamic dashboards with real-time, multi-dimensional views, graphs and reports

Enterprise Project Management

Enterprise Project Management provides the framework and disciplines your company needs to plan and track projects with clarity and precision and respond with greater agility to the demands of a fast-changing business environment. Our project management professionals orchestrate the spectrum of activities necessary for successful completion of the most complex projects, with proficiencies that include:

- ✔ **Project basic process groups** – initiating, planning, executing, controlling
- ✔ **Core workflows:** requirements, analysis, design, implementation, test
- ✔ **Precision software execution** – inception, elaboration, construction, transition

Our focused, enterprise-ready project management environment is easier and faster to get started, extensible and programmable and gives you greater visibility and insight into the strategic direction of your business.

Major project manager responsibilities include:

- ✔ Engagement Management Transition
- ✔ Communication/Client Satisfaction
- ✔ Team Management
- ✔ Integration Management
- ✔ Scope Management
- ✔ Time Management
- ✔ Schedule Management
- ✔ Procurement Management
- ✔ Risk/Issues Management
- ✔ Cost Management
- ✔ Change Management
- ✔ Quality Management

ComFrame project management clients are able to consistently:

- ✔ Achieve enterprise-wide efficiencies in project delivery
- ✔ Meet project goals and gain customer satisfaction
- ✔ Embrace change throughout the project lifecycle
- ✔ Comply with government and regulatory requirements

Make Strategic Goals a Reality

ComFrame project consultants and certified project managers become an extension of your team, providing the professional resources and guidance you need to gain project management maturity and induce rapid, predictable organizational change. Our technology solutions help you consistently plan, execute, manage and monitor projects across the enterprise, providing the top-down portfolio analyses and bottom-up, process-driven tools you need to achieve precision in all of your work.

Partnered with Microsoft for Project Success

ComFrame is one of only a handful of Microsoft partners – less than 20 in the U.S. – that has achieved gold-certification status on Microsoft's EPM product. No one else in the Southeast brings a better record of success on Project Server deployments to enterprise customers.
