

News Release

Robert Cain Joins ComFrame Business Intelligence Consulting Practice

New Hire Brings Greater Microsoft® SQL Development Expertise to ComFrame Clients

BIRMINGHAM, AL – Oct 27, 2009 – ComFrame Software Corporation, a leading provider of technology strategy and custom software development services for companies across the southeastern and central United States, today announced the hire of Robert Cain as a Senior Business Intelligence (BI) Architect. In his new role with ComFrame, Cain will help ComFrame clients develop new BI and enterprise data management strategies and applications using Microsoft’s SQL Server platform.

Cain is a Microsoft “Most Valuable Professional” (MVP) in SQL development. He is a frequent speaker at technology conferences and a contributing author to the book "SQL Server MVP Deep Dives," due to be released this month. He also maintains the popular blog arcanecode.com. Cain brings more than 15 years of experience in business intelligence and data management to ComFrame, including five years designing and developing the BI/data warehouse for a southeastern nuclear power company. Prior to that, he spent ten years as a senior IT consultant, working for a variety of Birmingham area customers. Cain’s initial focus at ComFrame is development of the SQL Server Business Intelligence Data Warehouse for the NASA ARES project.

About ComFrame

Since 1997, ComFrame Software Corporation has completed more than 300 elegant, large-scale software projects for clients across the southeastern and central United States, helping them reduce IT complexity and successfully deploy modern architectures and applications that improve business agility and efficiency. From offices in Birmingham, Nashville and Beijing, ComFrame delivers a broad range of custom solutions and packaged business applications. More than 110 architects, software engineers and project managers make up our highly skilled team. Expertise ranges from enterprise application development and integration to consulting, strategic business and brand management, business process and performance management, business intelligence and enterprise data management, information integration and collaboration management, project and portfolio management, IT mentoring and training in new technologies and service-oriented architectures.
